CONDITION OF THE PRESENT WORLD

We are living in a time of profound moral and spiritual decline. Across the world, the foundations of truth, justice, and righteousness are being shaken. What was once considered right is now often ignored, and what was once condemned is increasingly normalized. Society is witnessing a steady erosion of values—where respect for authority, reverence for life, and commitment to moral principles are fading. The absence of guiding laws rooted in truth and love has led to confusion, disorder, and instability.
